

NDRC 2017 Training Programme on South-South Cooperation of Addressing Climate Change: Seminar on Addressing Climate Change and Green Low-Carbon Development

Climate change is a major global challenge to mankind, as it is closely interconnected with human survival and national development. Developing countries, on the whole, is facing daunting tasks and mounting pressure in the international negotiation on climate change. In order to implement the training initiatives announced by President Xi Jinping at COP21, under the financial support of climate change international cooperation funds of the National Development and Reform Commission, Chinese Research Academy of Environmental Sciences will organize the “NDRC 2017 training programme on South-South cooperation of addressing climate change: seminar on addressing climate change and green low-carbon development” to share China’s experience and successful practices on climate change and green low-carbon development with other developing countries, and provide related training for officers, experts and technical personnel from developing countries.

Major Themes:

The policies and measures adopted and the endeavors and contributions made by Chinese government to respond to climate change will be presented to the participants in a systematic and comprehensive manner. The seminar will also include global climate management, China's climate change strategy and policy, China's ecological civilization construction, low-carbon development pilot demonstration, low-carbon technology industry application, etc.

Approaches of Training:

The seminar will include classroom instructions, group discussions, and on-site visits to low carbon technology enterprises. Participants are encouraged to provide Country Report of RECP progress and Cooperation Intention before coming to China. The final session will not include a test; yet, training insights will be discussed and presented by groups. Active participation in this final session is necessary.

Host:

National Development and Reform Commission of P.R.China (NDRC)

Organizer:

Chinese Research Academy of Environmental Sciences (CRAES)/
China National Cleaner Production Center (CNCPC)

Participants:

30 participants. The course will target government officers and technical personnel from developing countries focusing on climate change, green low-carbon development, Resource Efficient and Cleaner Production (RECP), environmental protection and other related areas.

Entry Requirements:

1. Application shall be submitted electronically via email (CNCPC1@craes.org.cn).
2. The participants should meet the following qualifications and requirements:
 - a) The participants should be one of the following:
 - Government officers, experts or technical personnel in climate change field;
 - Representative from climate research related institutions and organizations;
