

Introduction

Circular economy

Objectives of the study

1. Develop a waste stream specific circular economy roadmap;
and
2. Improve the educational programmes that integrate the circular economy into curricula.

- Analysis of waste management and the circular economy for selected waste streams in Côte d'Ivoire;
- SWOT analysis to prioritize a waste stream with the highest circular economy potential;
- Development of a circular economy roadmap for the prioritized waste stream; and
- Integration of circular economy knowledge and practices in educational curricula.

- Set up a costed action plan based on an impact assessment
- Translate it into a roadmap with short, medium and long term goals - consider time for capacity building but also local circumstances
- Focus on low hanging fruit - so you can show short term results.
- Involve always national, regional and local authorities
- Consider marketing campaigns (alternatives) to implement your new legislation
- Start with interesting pilot cases which are scalable (upscaling capacity)
