

Technology Fact Sheet for Mitigation

Technology	Description	Benefits	Challenges
Industrial and commercial end-use energy efficiency (for commercial/industrial and mining) ⁱ	The measures include air conditioning efficiency, load control measures, ripple control technologies, etc	This measure contributes to reduction in electrical energy demand and avoids premature investments in energy supply in addition to reducing GHG emissions and air pollution.	May need barrier removal for consumers to be aware and be availed with commercial loans for implementation. Funding probably recoverable through savings

ⁱ This fact sheet has been extracted from TNA Report – Technology Needs Assessment and Technology Action Plans For Climate Change Mitigation– Zambia. You can access the complete report from the TNA project website <http://tech-action.org/>
