

INNOVATIVE CLIMATE TECHNOLOGY INCUBATION

Aaron Sangmor Nyarkotey
Advisor, Energy Sector

Accra, Ghana

Africa Climate Week, 2019
CTCN Panel Session

18/03/2019

SNV Incubation Approach

- Developing innovation
- Market validation
- Investor-readiness
- Scaling up impacts

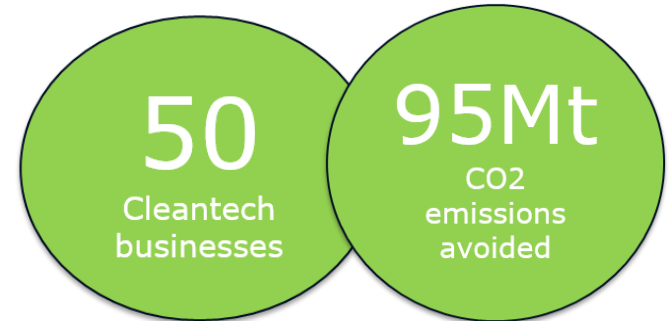

- Case Studies:
 - Ghana Climate Innovation Centre (GCIC) Project (www.ghanacic.org)
 - 2SCALE Project (www.2scale.org)

GCIC Project

- Roadshow & bootcamp
- Cohort admission

- Bouquet of services
 - Entrepreneurship classes
 - PoC grants
 - Technology & Product Development
 - Market Growth and Access
 - Policy Advocacy

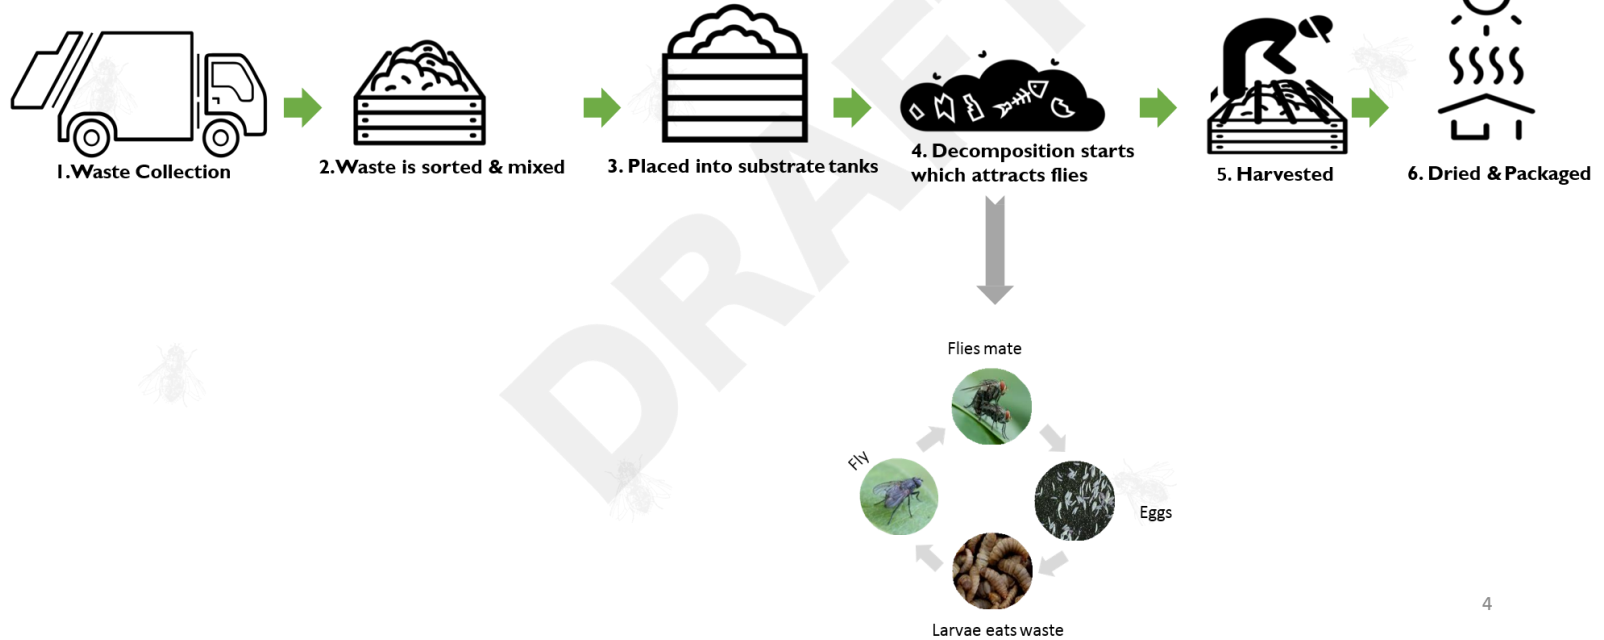

Case Study: Neat Eco Feeds

- Applied as a meat butcher and sales point, with intention to address waste problem
- Piloted maggot production from meat waste
- Scaled up maggot production, and inculcated zero-waste approach:
 - Maggotry
 - Compost and liquid residue for vegetable production

How it works?

Flies & their larvae convert slaughter waste, creating a “zero waste to landfill”

Thank You

Q & A ?
