

14 April 2016

Dear Member of the Climate Technology Centre and Network (CTCN),

UNEP is organizing the first global Science-Policy Forum in Nairobi, 19-20 May 2016, as part of the overall programme for the second session of the UN Environment Assembly (UNEA-2) 23-27 May 2016.

The Forum presents an excellent opportunity for the science community to engage with policy-makers and have a constructive dialogue on the science and knowledge required to support informed decision-making to deliver on the environmental dimension of the 2030 Agenda for Sustainable Development. A number of high-level and inspirational speakers will address various sessions of the Forum. The attached flyer provides more information.

You are cordially invited to attend the Forum. I attach herewith the annotated provisional agenda for the Forum and the coordinator for your session will contact you soon to discuss and agree upon your contribution to the Forum and other matters relating to your participation.

It is mandatory to register for all UNEA-2 events on the registration portal at this link: <http://registration.unon.org/unea/> and you will also need to upload a standard passport size photo.

More information on UNEA, accommodation in Nairobi, and other background documents are being uploaded continuously to the UNEA website (www.unep.org/unea/) and you are advised to check this site on a regular basis.

I look forward to meeting you at this important event.

Yours sincerely,

A handwritten signature in blue ink, appearing to read 'JMcGlade', with a long horizontal stroke extending to the right.

Jacqueline McGlade
Chief Scientist
