

Advisory Board to the CTCN  
Twelfth meeting

3-5 October 2018  
AB/2018/12/S.4

### CTCN Communications Snapshot

*The following information provides a snapshot of CTCN communications activities since Advisory Board 11.*

**CTCN video:** The CTCN is creating a short video describing its technical assistance collaboration on energy and gender in West Africa which will be shown in Q4 2018.

#### **Technology Mechanism Video: Finding ways to boost climate tech innovation**

This video describes how key UN bodies can provide technical support and finance to developing country entrepreneurs in order help combat climate change.

**Media coverage:** CTCN communicates frequently with local and international media in order to raise awareness about the Centre and its services. More than 40 articles in international press and country/region-specific media (including Africa region, Malaysia, China, Korea, etc.) have been published. For example:

#### **President of Zimbabwe launched the National Climate Policy & Climate Smart Agriculture Manual**

<https://www.ctc-n.org/news/ctcn-media-president-zimbabwe-launched-national-climate-policy-climate-smart-agriculture-manual>

#### **Africa gains momentum in green climate solutions**

<https://www.ctc-n.org/news/ctcn-media-africa-gains-momentum-green-climate-solutions>

#### **Waste-to-energy and circular economy workshops to be held in Uruguay**

<https://www.ctc-n.org/news/48-african-countries-met-nairobi-explore-climate-change-technologies>

UN bodies work to boost climate tech innovation for achieving the Paris Agreement

<https://www.ctc-n.org/news/un-bodies-work-boost-climate-tech-innovation-achieving-paris-agreement>

### New publications: Climate Technology Incubators and Accelerators

The Climate Technology Centre and Network, the Technology Executive Committee and the Green Climate Fund launched 2 publications which explore challenges and opportunities for strengthening climate technology incubators and accelerators in developing countries.

<https://www.ctc-n.org/news/new-report-and-publication-climate-technology-incubators-and-accelerators>

### CTCN Newsletters:

CTCN distributed 12 e-newsletters to relevant stakeholders (totaling more than 11,000 subscribers). E-newsletters contain information on relevant climate technology events, trainings, and technical assistance.

**Communications materials** were provided for 25+ international and (sub) regional events (NDE forums, Climate weeks, global events, conferences, etc.).

### Social media:

The CTCN posts information daily on Facebook (2,325 likes, 6% increase since AB11) and Twitter (2,066 followers, 14.4% increase since AB11) to keep stakeholders informed of services, events and technology information.
