

2.b) Summary of Actions as a Result of AB5

6th Advisory Board Meeting

United Nations
Framework Convention on
Climate Change

Actions as a result of comments from AB5

- **CTCN to take a proactive approach to reach out to countries that have not yet nominated their NDE.**
 - Director sent letters to these countries encouraging them to nominate their NDE so that they may benefit from CTCN services
 - These developing countries were encouraged to nominate their NDEs at CTCN Regional Fora

- **Advisory Board acknowledged the Secondment Programme as a promising approach to foster knowledge exchange and improve collaboration.**
 - Secondment Programme was launched and the first secondee started in mid-August

- **Technical assistance request-response procedures in place.**
 - CTCN to present a revised document on request-response process including clarity on implementer selection and request criteria

United Nations
Framework Convention on
Climate Change

Actions as a result of comments from AB5

- **CTCN encouraged to have more requests directly based on priorities identified in TNAs.**
 - Efforts have been made to better illustrate the extent to which CTCN requests are based on TNAs
 - The technical assistance process and procedures document highlights to developing countries how TNAs could be the basis for a request for CTCN technical assistance.
 - At Regional Fora, linkages between CTCN technical assistance and TNAs were emphasized and discussed.

- **CTCN to promote Network membership and develop a revised procedure for membership that also addresses membership expiry.**
 - Additional Network outreach through regional offices/contacts
 - Revised Network membership procedures were developed, including proposed deferral of membership expiry until further notice

Actions as a result of comments from AB5

- **CTCN requested to put in place rules and procedures to monitor and evaluate the effectiveness of the CTCN.**
 - A proposal on M&E rules and procedures was drafted for discussion
- **CTCN to present a revised stakeholder engagement plan that builds on the feedback provided by Advisory Board members.**
 - A revised draft stakeholder engagement plan was developed
- **A proposal made for CTCN to address global collaboration on research and development and demonstration (RD&D) of climate technologies.**
 - A specific agenda item has been included in Advisory Board meeting 6 to discuss CTCN's degree of involvement in RD&D
